REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art of reference is found in the combination of teachings by Ueda (JP 02-180105), Balla (US 4,264,668), Peiffer et al. (US 5,478,643), and Rosenberger et al. (WO 02/021220)

Ueda teaches a method of rolling out a web (W) and laminating an aluminum foil (F) thereto for high frequency induction heating by a heater (18) at a position on the web where it is to be heat sealed (abstract).

Balla teaches applying a thin sealing layer (3) of thermoplastic material over a powdered conductive layer (2) on a support (1) (column 3, lines 4-13; Figure 1).

Peiffer et al. teaches transferring a metal layer that has been vapor deposited on a film to a substrate (column 1, lines 28-43).

Rosenberger et al. teach printing a design (12) on the outside of a film composite (11) and laminating thermoplastic layers (13, 14) over the printed layer (paragraphs 0054 and 0121 of English translation document US 2003/0186032; Figure 2).

However, there are no teachings found in the prior art of producing a packaging laminated material comprising a step of transferring a silver-based thin film layer vapor-deposited on a substrate onto an inner face of a support layer to be heat sealed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
